

Unique Group enters into a pivotal partnership with POSH Subsea to offer integrated diving solution

Unique Group, one of the world's leading integrated subsea and offshore solution providers, has entered into a contract with Singapore-based POSH Subsea to offer integrated diving solutions. As part of the agreement, Unique Group will design, manufacture and deliver Classed Air and Saturation Dive systems for integration on POSH's vessels.

POSH has over 60 years of specialised experience in offshore and marine oil field services. The Group's subsea arm is supported by a fleet of young and diverse multi-purpose vessels capable of supporting subsea Inspection, Repair & Maintenance (IRM), as well as construction & installation works.

Under this partnership, Unique Group will be supplying a holistic suite of classed air & saturation diving equipment, compliant to the stringent Oil and Gas Producers (OGP) 468 and International Marine Contractors Association (IMCA) guidelines, as well as consumables and technical support during and post installation, spanning across a two-year period. The Unique Equipment Manager (UEM), a digitalised planned maintenance system integrated with the dive systems will enable POSH to track the condition of the equipment more accurately thereby minimising operational downtime.

Speaking about this partnership, Harry Gandhi, CEO of Unique Group, commented: "We are pleased to announce our partnership with POSH, an industry-leading offshore marine operator. This bears witness to our compliance with their stringent requirements and is yet another testament to our track record for delivering timely and quality solutions."

Kurush Contractor, Divisional Director at POSH Subsea, also added: "Partnering with a reliable equipment manufacturer is critical for POSH as we continually strive for operational excellence. Unique Group has demonstrated professionalism and deep technical expertise in delivering state-of-the-art diving systems on time. Unique's ability to design and build equipment specific to our needs would be of immense value to POSH."
