### **CHC Navigation Introduces New GNSS RTK Tablet**

Portable and versatile, the LT700H RTK tablet brings accuracy at your fingertips.

Shanghai, China – November 1<sup>st</sup>, 2019 - CHC Navigation, today announced the availability of the LT700H RTK Android tablet designed to increase efficiency and productivity of mobile field workforce in any applications requiring centimeter to decimeter positioning accuracy. Portable, rugged and versatile, the LT700H enables precision GIS data collection, forensic mapping, construction site layout, environmental surveys, landscaping and earthmoving jobs.

Powered by 184-channel high performance GPS, Glonass, Galileo and BeiDou module and superior tracking GNSS helical antenna, the LT700H provides best in class position availability in demanding environments. Its integrated 4G modem ensures seamless communication from field-to-office and robust connectivity to GNSS RTK networks corrections.

“With the LT700H RTK Tablet, we are offering a professional and accurate GNSS solution to any mobile applications requiring high-portability,” said George Zhao, CEO of CHC Navigation. “The LT700H enables further use of GNSS technology, from single operator to companies with large field crew.”

Combined with CHCNAV Landstar 7 field data collection software, the LT700H vibrant 8” IPS sunlight-viewable screen perfectly displays any GIS data tables, vector and raster maps or high-resolution pictures. The LT700H Google GMS certification guarantees compatibility with any common GIS and mapping Android applications.

#### **About CHC Navigation:**

Founded in 2003, CHC Navigation is a publicly-listed company creating Innovative GNSS Navigation and Positioning Solutions. With a global presence across the world and distributors in over 100 countries and more than 1 300 employees, CHC Navigation is today recognized as one of the fastest-growing company in Geomatics Technologies.
